PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with 5+ years of experience in designing, developing, and maintaining scalable web and mobile applications using PHP, CodeIgniter, JavaScript, React.js, Node.js, Express.js, ASP.NET Core, Core Java, Python, MySQL, and MongoDB. Specialized in building ERP, CRM, Hotel Management, SaaS-based solutions, and dynamic business automation systems with strong expertise in backend architecture, REST API development, database optimization, and secure application development.

Experienced in developing payment-integrated platforms, real-time dashboards, reporting systems, Android applications, and scalable multi-user business applications for real-world environments. Strong understanding of MVC architecture, modular development, clean coding principles, authentication systems, debugging, and performance optimization.

TECHNICAL SKILLS

Languages	PHP, JavaScript, Python, Core Java, SQL, HTML5, CSS3, XML
Frontend	React.js, Bootstrap, jQuery, AJAX, Responsive UI Development
Backend	Core PHP, CodeIgniter, Node.js, Express.js, ASP.NET Core, REST APIs
Mobile Development	Android Studio, Android App Development using Java and XML
Database	MySQL, MongoDB
Frameworks	CodeIgniter, Express.js, ASP.NET Core
Tools	Git, GitLab, VS Code, Visual Studio, Android Studio, Postman, XAMPP
Architecture	MVC Architecture, Modular Development, REST API Design, Clean Code Principles
Security	CAPTCHA Integration, IP Blocking, Authentication, Session Security
Integrations	Razorpay Payment Gateway, Webhooks, Third-Party APIs
Other Skills	SEO Optimization, Database Optimization, Debugging, Performance Optimization

WORK EXPERIENCE

Full Stack Developer <i>Aadija Technologies</i>	2021 – Present
---	----------------

- Developed and maintained scalable ERP, CRM, Hotel Management, and business automation systems using PHP, CodeIgniter, JavaScript, MySQL, and REST APIs.
- Built responsive frontend interfaces and dynamic admin dashboards using React.js, Bootstrap, AJAX, and jQuery.
- Developed RESTful backend services and APIs for real-time business applications.
- Worked with Node.js and Express.js for API development and backend processing.
- Built modular backend architecture and optimized database operations for high-performance applications.
- Integrated Razorpay payment gateway with webhook verification and secure transaction processing.
- Implemented advanced features such as dynamic forms, reporting systems, search modules, and server-side pagination.
- Developed Android applications using Android Studio with Java and XML layouts.
- Implemented security mechanisms including CAPTCHA validation, IP-based blocking, authentication, and secure session management.
- Worked on scalable production-level systems used by hotels, educational institutions, and business organizations.

PROJECTS

Hotel Management System

- Developed a complete hotel management solution with booking, billing, reporting, customer management, and admin dashboard modules.
- Implemented real-time room availability, invoice generation, and multi-user management systems.
- Optimized backend processing and reporting for high-usage environments.

CRM Management System

- Developed a CRM platform with lead tracking, activities, notes, follow-ups, and reporting functionalities.
- Implemented AJAX-based live search, filtering, pagination, and dynamic data handling.
- Designed modular architecture for maintainability and scalability.

ERP & College Management System

- Built ERP modules including student registration, fee management, migration systems, leave reports, and dynamic reporting.
- Developed online application systems with advanced validation and automated workflows.
- Optimized database queries and reporting systems for faster response times.

Payment & Security Systems

- Integrated Razorpay payment gateway with secure webhook verification and automated transaction processing.
- Developed CAPTCHA validation and IP-blocking systems to prevent unauthorized access and brute-force attacks.
- Implemented secure login authentication and session handling systems.

Inventory & SaaS-Based Applications

- Developed scalable inventory and management systems using React.js, Node.js, Express.js, and MongoDB.
- Built REST APIs and modular backend architecture for scalable SaaS applications.
- Implemented real-time data handling and optimized API response performance.

Android Mobile Applications

- Developed Android applications using Android Studio with Java and XML layouts.
- Integrated REST APIs and backend services into Android applications.
- Designed responsive mobile UI screens and implemented secure login and data handling systems.

EDUCATION

Master of Computer Applications (MCA)	Pursuing
Bachelor of Computer Applications (BCA)	2017 – 2020
Bidhan Chandra College, Asansol	
Percentage: 86%	

KEY ACHIEVEMENTS

- Successfully developed and deployed multiple business-critical web and mobile applications.
- Improved application performance through backend optimization and efficient database design.
- Built secure payment-integrated systems with automated workflows and webhook handling.
- Developed scalable MVC-based enterprise applications for hospitality and educational sectors.
- Adapted modern technologies including React.js, Node.js, ASP.NET Core, MongoDB, and Android development.

STRENGTHS

- Strong problem-solving and debugging skills

- Ability to develop scalable production-ready applications
- Strong backend architecture and database optimization expertise
- Quick learner with adaptability to modern technologies
- Experience handling real-world client requirements and deployments
